DETAILED ACTION

Drawings

- (1.) The drawings filed on December 4, 2003 are accepted by the examiner.

Information Disclosure Statement

- (2.) The Information Disclosure Statement filed on March 8, 2004 is acknowledged and will be considered in due course.

Election Of Species

- (3.) This application contains claims directed to the following patentably distinct species of the claimed invention: (A) Figures 14-17, and (B) Figures 33-35.

Applicants are required under 35 USC 121 to elect a single distinct disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP section 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103(a) of the other invention.

Conclusion

(4.) Action on the merits of the claims is held in abeyance pending applicants' response.
